## Specific Heat and Energy Practice Quiz Questions

1. A 550 g rock is thrown 7.5 m in the air at a speed of $25 \mathrm{~m} / \mathrm{s}$. What is the mechanical energy of the rock?
2. A truck weighing 4500 kg speeds at $75 \mathrm{~km} / \mathrm{h}$. What is its kinetic energy?
3. What is the specific heat of oil if 500.0 g is heated from $10^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$ and 45000 J of heat was absorbed?
4. What is the heat energy of 60 g of water with a change in temperature of $25^{\circ} \mathrm{C}$ ?
5. What is the speed of a rock when it reaches the water if it dropped 45.0 m from a mountain and it weighs 7.5 kg ?
6. What is the potential energy of a ball if it is 7.0 m high and weighs 700 g ?
7. What is the final temperature of water if 450 ml absorbs 17600 J of heat and has an initial temperature of $60.0^{\circ} \mathrm{C}$ ?
8. What is the height of a ball which weighs 7.5 kg and has a potential energy of 5500 J ?
9. What is the maximum speed the ball below can reach if the ball weighs 620 g is found at a height of 150 cm ?

10. What is the maximum speed the ball can reach if at point $A$ the height is 8 cm , travelling at a speed of $2.00 \mathrm{~m} / \mathrm{s}$ and the ball weighs 120 g ?

11. Three beakers each containing 50.0 g of a different solution are placed on a hot plate. The substances are identified by the letters $X, Y$ and $Z$ each absorbed 2500 J of heat. After heating the beakers for two minutes, the following results are obtained:

| Substance | Mass <br> (g) | Initial temperature $\left({ }^{\circ} \mathrm{C}\right)$ | Final temperature $\left({ }^{\circ} \mathrm{C}\right)$ |
| :---: | :---: | :---: | :---: |
| X | 50.0 | 20.0 | 80.0 |
| Y | 50.0 | 20.0 | 68.0 |
| Z | 50.0 | 20.0 | 45.0 |

a) Which of these substances has the greatest specific heat capacity? Justify your answer.
b) Which of these substances absorbed the most heat? Explain your answer.
12. Using the graph below, determine the mechanical energy when the rock has fallen for 2 s ? Kinetic Energy of Falling Rock

A) 0 J
B) 750 J
C) 200 J
D) 550 J
13. At what point is the potential energy of the ball at its maximum?

A) At the top of the arc
C) Just before the ball hits the ground
B) Just before hitting the ball
D) Just after the bat strikes the ball
14. Using the same picture and answers as number 13, ignoring friction, at what point in its motion is the kinetic energy of the ball at a maximum?
15. A quarterback throws a football weighing 315 g at a speed of $12.7 \mathrm{~km} / \mathrm{h}$ at a height of 12 m . What is the football's mechanical energy?
