

## Trigonometry worksheet

 <p>A right-angled triangle with a right angle at the bottom-right corner. The hypotenuse is labeled <math>10\text{ N}</math>. The angle at the bottom-left corner is <math>34^\circ</math>. The vertical side on the right is labeled <math>x</math>.</p>	 <p>A right-angled triangle with a right angle at the bottom-right corner. The hypotenuse is labeled <math>12\text{ N}</math>. The angle at the top-right corner is <math>56^\circ</math>. The vertical side on the right is labeled <math>x</math>.</p>
 <p>A right-angled triangle with a right angle at the bottom-right corner. The hypotenuse is labeled <math>x</math>. The angle at the bottom-left corner is <math>23^\circ</math>. The horizontal side at the bottom is labeled <math>32\text{ N}</math>.</p>	 <p>A right-angled triangle with a right angle at the bottom-left corner. The hypotenuse is labeled <math>x</math>. The angle at the top-left corner is <math>45^\circ</math>. The horizontal side at the bottom is labeled <math>15\text{ N}</math>.</p>
 <p>A right-angled triangle with a right angle at the bottom-left corner. The hypotenuse is labeled <math>101\text{ N}</math>. The angle at the bottom-right corner is <math>72^\circ</math>. The horizontal side at the bottom is labeled <math>x</math>.</p>	 <p>A right-angled triangle with a right angle at the bottom-left corner. The hypotenuse is labeled <math>75\text{ N}</math>. The angle at the bottom-right corner is <math>30^\circ</math>. The vertical side on the left is labeled <math>x</math>.</p>
 <p>A right-angled triangle with a right angle at the bottom-left corner. The hypotenuse is labeled <math>15\text{ N}</math>. The angle at the bottom-right corner is <math>35^\circ</math>. The vertical side on the left is labeled <math>x</math>.</p>	 <p>A right-angled triangle with a right angle at the bottom-left corner. The hypotenuse is labeled <math>Y</math>. The angle at the top-left corner is <math>80^\circ</math>. The horizontal side at the bottom is labeled <math>28\text{ N}</math>.</p>
